## **Hughes Precision Products LLC, Launches New Website Offering Suppressors and Related Shooting Sports Solutions**

Visitors will find extensive product resources and an enhanced user experience at [www.hughesprecision.com](http://www.hughesprecision.com)

The new website provides quick and intuitive access to its suppressor product line, as well as extensive resources for customers and dealers.

According to Kevin Stewart, General Manager for Hughes Precision, The new web site will insure a superior and informative user experience for our Visitors and Dealers. Development and creation of the new web site has taken nearly 5 months to complete, but we feel the web site will help guide visitors and dealers to the suppressor solutions and accessories best suited for their shooting requirements and needs.

Simplified site navigation and enhanced search capability make it quick and easy for the visitor to find the appropriate product, accessories or information to suit a wide range of shooters requirements, from the FAQs section through a comprehensive technical breakdown of our products and user manuals.

### **Other website features include:**

Convenient forms, product manuals, service and technical specifications.

Hughes Precision news and events, including a announcements of new laws and/or rules affecting the shooting sports.

Hughes Precisions latest innovative new products and processes.

### **ABOUT:**

Founded in Indian River, Michigan in 2007, Hughes Precision Products LLC began with the focus on making firearms hearing safe for all hunting and shooting applications, introducing products that have never been made before. Hughes Precisions belief in the fundamental premise that firearms don't have to be loud has been the driving force.

Hughes Precision manufactures some of the finest, safest and most accurate sound suppressors, muzzle devices, and related products in the industry today. By investing in innovation, customer service, in-house manufacturing, advocacy, education, and talent, Hughes Precision Products LLC continues it pursuit for the most accurate, robust, quiet and dependable suppressors in the market today.
